1972 French Polynesia Nuclear Testing – South Pacific Naval and Scientific Photographic Archive. An interesting collection of approximately 60 original black and white photographs, together with a quantity of 35mm colour slides and negatives, relating to naval and scientific operations in the South Pacific during the period of French nuclear testing. The collection includes photographs of British and French naval vessels, notably the British landing ship L3036 and French vessel L9022, military aircraft including French aircraft numbered 436 and 437, shipboard personnel and crew photographs, scientific and meteorological equipment, radar displays, balloon deployments and monitoring operations at sea. Of particular interest are photographs showing specialist recording and observation equipment, balloon launches from naval vessels and associated sea conditions, including an annotated photograph dated 30 June 1972 and a meteorological recording chart dated 7 June 1972. Further images depict Pacific island locations, including Anuanuraro Atoll in French Polynesia, local inhabitants and activities aboard the vessels. Several photographs bear contemporary handwritten annotations identifying locations, equipment and operations. The collection also includes colour transparencies showing naval vessels, balloon deployments, aircraft and scientific activities. An unusual photographic archive providing an insight into naval and scientific operations in the South Pacific during the French atmospheric nuclear testing programme of the early 1970s. 953 *E*
France, 1870–71, Siege of Paris. A fascinating group of eight letters from a single correspondence, written between 3 November 1870 and 28 January 1871, all addressed to Mademoiselle Baude at the Hôtel de Nice, Vichy-les-Bains, Allier. The sender's signature appears to read A. Garnaud. The letter of 17 January includes a note from Mademoiselle Baude's cousin, apparently signed A. Dutheil.

Seven letters are franked with a Napoléon III 20c blue, the stamp missing from the 31 December letter. Seven are written on Gazette des Absents letter sheets, Nos. 13, 15, 17, 21, 24, 28 and 33. The proposed ballon monté flights, in order of ascent, are Ferdinand Flocon, Franklin, Général Renault, Général Chanzy or Lavoisier (19 December letter), Newton, Duquesne and La Poste de Paris. The final letter was written on the day of the Général Cambronne's last flight and probably travelled by ordinary post. The letters report the loss of Le Bourget and describe wounded men who had to "spend the night on the battlefield".

On 10 December the writer asks, "Will the armies from the provinces come, yes or no?" On 7 January the writer reports, "The cannon thunder ceaselessly, night and day." By 28 January, short of provisions, the writer speaks of "a capitulation that we shall be forced to accept". Full French transcriptions and English translations are available with the lot *(pictured left)* **£650**

There are some marked re-entries and repairs, particularly on plates 7, 8, 9 and 12.

Though the paper is normally white, some printings showed bluing and stamps showing the "Ivory Head" may therefore be found.
